

## **MARINA COMMITTEE SPECIAL MEETING MINUTES NOVEMBER 2, 2009**

A special meeting was held at the Marina Building on November 2<sup>nd</sup> at 4:00 PM regarding the dredging of the Marina.

Present: Jan Dart, Bruce Charles, Tom Levy, Tom Romdenne, Gary Paape, Mike LaCrosse, Russ Stoller and Dale Jandrian

Also present: Mike Groh of Geo-Synthetics Inc and Kent Peterson of PCI

Mike Groh looked at the sludge issue in the Marina and took samples for testing. He will determine what type of collection bag would be necessary to hold the dredgings. Kent has the dredging equipment that could be used with the bag system if that is the plan accepted. Mike showed a video of a project similar to what would be done in this Marina which used the bagging system.

After some discussion as to where the bags could be stored as they de-water, it was determined that the basin in front of the Youth Club might be a good location. Mike, Kent and Tom Levy went to look over the area.

Dale Jandrian, Kewaunee County Highway Commissioner, attended the meeting to learn if the residue after de-watering could be used as cover at the land fill site. Mike Groh felt it would be a great way to dispose of the dried sludge.

Mike will get back to the Committee before Thanksgiving with findings from the samples.

The meeting adjourned at 4:45 PM.
